## The NAC BenefitSolutions Offers A Variety Of Index Options Including

<b>S&amp;P 500® Index</b>	This index has been widely regarded as the best single gauge of the large cap U.S. equities market since the index was first published in 1957. The index includes 500 leading companies in leading industries of the U.S. economy.
<b>S&amp;P 500® Low Volatility Daily Risk Control 5% Index</b>	The S&P 500® Low Volatility Daily Risk Control 5% Index strives to create stable performance through managing volatility (i.e. risk control) on the S&P 500 Low Volatility Index. The S&P 500 Low Volatility Index measures performance of the 100 least volatile stocks in the S&P 500. The index adds an element of risk control by allocating between stocks, as represented by the S&P 500 Low Volatility Index, and cash.
<b>Dow Jones Industrial Average™ Index (DJIA®)</b>	Dow Jones Industrial Average™ Index – The oldest continuing stock market index, the DJIA is one of the most well known and widely followed indicators of the U.S. stock market in the world. It is represented by 30 of the largest U.S. stocks, including household names and leaders in their respective industries.
<b>Nasdaq-100® Index</b>	The Nasdaq-100 index includes 100 of the largest domestic and international non-financial securities listed on The Nasdaq Stock Market based on market capitalization. The index reflects companies across major industry groups including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology.

## Fixed and Index Account Options

<b>Monthly Average with Participation Rate</b>	<b>Monthly Average</b>	This method for determining any Interest Credit is calculated by comparing the Index Value on the first day of the contract year to the Monthly Average Index Value. The Monthly Average Index Value equals the sum of the monthly index values over the contract year, excluding the beginning Index Value on the first day of the contract year, divided by 12. The annual Interest Credit will never be less than zero.
	<b>Participation Rate</b>	Once a gain has been calculated using the Monthly Average Index Account option, a Participation Rate is applied. The Participation Rate is a percentage that is multiplied by the gain at the end of the contract year and is used to determine the Interest Credit to your contract. The Participation Rate is guaranteed for the first contract year, and can change each year thereafter on the contract anniversary. The Participation Rate is declared each year at the Company's discretion. However, at no time will it be less than the minimum guaranteed Participation Rate.
<b>Annual Point-To-Point with Index Cap Rate</b>	<b>Annual Point-To-Point</b>	This calculation method measures the change in index value using two points in time; the beginning index value and the ending index value for that year. Index linked gains are calculated based on the difference between these two values. The index change, if any, is then subject to an Index Cap Rate. The annual Interest Credit will never be less than zero.
	<b>Index Cap Rate</b>	Your annuity applies an Index Cap Rate, or upper limit, to calculate your Interest Credits each year applied to the Annual Point-to-Point With Cap Index Account option. This cap is applied annually and may change annually. It is declared on the contract anniversary and is guaranteed for that year. The Index Cap Rate is set at the Company's discretion. However, at no time will this cap ever fall below the minimum guaranteed Index Cap Rate set for the Annual Point-to-Point With Cap Index Account.
<b>Annual Point-to-Point with Index Margin</b>	<b>Annual Point-To-Point</b>	This calculation method measures the change in index value using two points in time; the beginning index value and the ending index value for that year. Index linked gains are calculated based on the difference between these two values. The index change, if any, is then subject to an Index Margin Rate. The annual Interest Credit will never be less than zero.
	<b>Index Margin</b>	Once a gain has been calculated using the Annual Point-to-Point With Margin Index Account option, an Index Margin is subtracted. The Index Margin is guaranteed for the first year, but can change each year thereafter at the Company's discretion. The Index Margin is set in advance each contract year, however at no time will it be greater than the maximum Index Margin for the Annual Point-to-Point With Margin Index Account.
<b>Monthly Point-to-Point with Index Cap Rate</b>	<b>Monthly Point-to-Point</b>	This method for determining any Interest Credit uses the monthly changes in the Index Value, subject to a monthly Index Cap Rate. The Interest Credit is credited annually and is based on the sum of all the monthly percentage changes in the index value—which could be positive or negative. On each contract anniversary, these monthly changes, each not to exceed the monthly Index Cap Rate, are added together to determine the Interest Credit for that year. Negative monthly returns have no downside limit and will reduce the Interest Credit, but the Interest Credit will never be less than zero.
	<b>Index Cap Rate</b>	Your annuity applies a monthly Index Cap Rate, or upper limit, to calculate your Interest Credits each year for the Monthly Point-to-Point. This cap is applied monthly and may change annually. The Index Cap Rate will be declared on each contract anniversary and is guaranteed for that year. The Index Cap Rate is set at the Company's discretion, however, at no time will this cap ever fall below the minimum guaranteed Index Cap Rate set for the Monthly Point-to-Point Index Account.
<b>Fixed Account</b>		Premium allocated to the Fixed Account will earn the current interest rate and is credited daily. This rate will be guaranteed for the entire contract year and will renew annually. The Fixed Account current interest rate is set at the Company's discretion on each contract anniversary and will never fall below the minimum guaranteed fixed account interest rate.

## Product Details

The NAC BenefitSolutions<sup>SM</sup> is issued on form NC/NA1006A (certificate/contract), AE560A, AE561A, AE563A, AE564A, AE565A, AE567A, LR427A, and LR433A (riders/endorsements) or state variation by North American Company for Life and Health Insurance<sup>®</sup>, West Des Moines, IA. This product, its features and riders may not be available in all states.

Fixed Index Annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. They may not be appropriate for all clients.

### Special Notice Regarding The Use Of A Living Trust As Owner Or Beneficiary Of This Annuity.

The use of living trusts in connection with an annuity contract can be a valuable planning mechanism. However, a living trust is not appropriate when mass-produced in connection with the sale of an insurance product. We strongly suggest you seek the advice of your qualified legal advisor concerning the use of a trust with an annuity contract.

Neither North American, nor any agents acting on its behalf, should be viewed as providing legal, tax or investment advice. Consult with and rely on a qualified advisor. Under current law, annuities grow tax deferred. Annuities may be subject to taxation during the income or withdrawal phase. The tax-deferred feature is not necessary for a tax-qualified plan. In such instances, you should consider whether other features, such as the Death Benefit, lifetime annuity payments, and any other features make the Contract appropriate for your needs.

Withdrawals taken prior to age 59 1/2 may be subject to IRS penalties.
